Branch Name: d4-ctonazzi

1. Low-Fidelity Wireframes (Mobile-First)

Insert/export images of your sketches or digital mockups. Each wireframe should be clearly labeled.

2. Functional Requirements

Provide a bullet-point list of core app features. Be concise but detailed enough to show scope.

- Sign-up, login, and logout with authentication.
- Sign in, sign out, add/remove data
- Login page, dashboard, separate pages for
- Data persistence with backend integration

- Error handling & input validation
- Privacy for user sensitive info

3. User Stories

Provide 3–5 detailed user stories following the required format.

1. As a student, I want an easy way to find and manage appointments
2. As a student, I want an easier way to match my needs with available opportunities.
3. As a medical practitioner, I want to be able to find motivated students for my practice.
4. As a medical practitioner, I want a secure way to guarantee that the students I am looking for are reputable.

4. User Journey Flow

Choose one format: flow diagram (preferred) or a step-by-step written description.

Option B: Written Description

1. User opens app → sees login screen.
2. User logs in successfully → redirected to dashboard.
3. User selects messages → Shows message page
4. User selects appointments → Show appointments page with all appointments.
5. User selects profile → Show profile edit page with fields
6. Back buttons (all pages) → switch to previous page

5. Document Layout Professional

Document must be organized, clean, professional, and ready for a developer to pick it up and begin coding.
