Intro student, unspecialized:

As an undecided student, I need open access to a lot of options so that I can decide my specialty.

Make profile, get appointment data, send appointment request, chatroom functions.

As a medical practitioner, I need a clear communication method for shadowing students so that I can avoid spam calls without turning away students.

Make profile, send appointment data to database, accept requests, chatroom functions.

As a student, I need to be able to receive feedback from my person whom I am shadowing so I can be able to work on what needs to be done better.

Make profile, get appointment data, send appointment request, chatroom functions.

As a student, I need to be able to find opportunities in a time-effective manner so that I can meet the other requirements to be a med student.

Make profile, get appointment data, send appointment request, chatroom functions.

As a student I need to be able to create and edit my profile in a way where I can find those in my field of specialty more easily.

Make profile, get appointment data, send appointment request, chatroom functions.
